

馆藏单件状态item-status取值范围补充提交社区的情况说明

目前 folio最新版本 inventory-storage中单件状态的取值范围：

```
、  
"enum": [  
  "Aged to lost",  
  "Available",  
  "Awaiting pickup",  
  "Awaiting delivery",  
  "Checked out",  
  "Claimed returned",  
  "Declared lost",  
  "In process",  
  "In process (non-requestable)",  
  "In transit",  
  "Intellectual item",  
  "Long missing",  
  "Lost and paid",  
  "Missing",  
  "On order",  
  "Paged",  
  "Restricted",  
  "Order closed",  
  "Unavailable",  
  "Unknown",  
  "Withdrawn"  
]
```

从老系统需要映射过来需要用到的取值范围

```
、  
"enum": [  
  "Available",  
  "Awaiting pickup",  
  "Checked out",  
  "In process",  
  "In transit",  
  "Missing",  
  "On order",  
  "Paged",  
  "Declared lost",  
  "Order closed",  
  "Claimed returned"  
]
```

映射关系列表

```
* {"descr":"Archived","itemStatus":"a", "folioItemStatus": "In process"}
* {"descr":"Bindery","itemStatus":"b", "folioItemStatus": "In process"}
* {"descr":"Claimed Returned","itemStatus":"Claimed returned"}
* {"descr":"Damaged","itemStatus":"In process"}
* {"descr":"Item hold expired","itemStatus":"Available"}
* {"descr":"Item being held","itemStatus":"Awaiting pickup"}
* {"descr":"Checked In","itemStatus":"i", "folioItemStatus": "Available"}
* {"descr":"Lost","itemStatus":"Missing"}
* {"descr":"Lost Recall","itemStatus":"lr", "folioItemStatus": "Declared lost"}
* {"descr":"Item missing","itemStatus":"Missing"}
* {"descr":"Missing Inventory","itemStatus":"Missing"}
* {"descr":"Newly Acquired","itemStatus":"Available"}
* {"descr":"Checked out","itemStatus":"Checked out"}
* {"descr":"On Order","itemStatus":"On order"}
* {"descr":"Reserve Bookroom","itemStatus":"In process"}
* {"descr":"Recall","itemStatus":"In process"}
* {"descr":"Reserve withdrawal","itemStatus":"rw", "folioItemStatus": "In process"}
* {"descr":"Shelving cart","itemStatus":"Available"}
* {"descr":"In Cataloging","itemStatus":"In process"}
* {"descr":"Transit Recall","itemStatus":"tc", "folioItemStatus": "In process"}
* {"descr":"Transit Request","itemStatus":"th", "folioItemStatus": "In process"}
* {"descr":"Transit","itemStatus":"tr", "folioItemStatus": "In process"}
* {"descr":"User fast added item","itemStatus":"In process"}
```

结论

目前通过老系统-folio的映射，我们所需的itemStatus暂时被社区主干版本覆盖，即没有超出社区的设计范围。

在后续过程中，根据实际情况再考虑增加item status（例如Damaged, Reserve, Recall, In Cataloging等）。
